**Website Plan for Restaurant Management Software**

**1. Core Functionalities**

**1.1. Purchase, Sales, and Reports**

- **Staff Selling to Clients (A):**

    o A comprehensive inventory management system that tracks purchases, sales, and generates reports for profits.

    o Features include:

        ▪ Sales tracking by staff.

        ▪ Automated profit/loss calculation.

        ▪ Reports for specific time periods.

        ▪ Graphical representation of data (e.g., charts for sales trends).

**1.2. Storage Management**

- **Store Overview:**

    o Dashboard displaying available inventory and quantities.

- **Storage History:**

    o Detailed log of incoming and outgoing stock.

    o Remaining stock calculation.

    o Alerts for low-stock items.

---

**2. Outdoor Kitchen**

**2.1. Client Requests**

- **Client Request Portal:**

    o Clients (B) can submit requests via the website.

    o Admin interface to view and respond to client requests.

    o Communication log between admin and clients.

**2.2. Schedule Management**

- **Integrated Calendar System:**

    o Displays scheduled events for clients, including dates, times, and delivery addresses.

    o Admin can manage, edit, and prioritize schedules.

**2.3. Payment Records**

- **Payment Tracking:**

- o Maintain a record of payments made by clients.

- o Status indicators for pending, completed, or failed payments.

## 2.4. Food Booking

- **Online Booking System:**

  - o Clients can book food items directly from the website.

  - o Confirmation emails and SMS notifications for bookings.

---

## 3. Home Service

## 3.1. Food Ordering

- **Menu Display:**

  - o A dynamic menu showing available food items with descriptions, prices, and images.

  - o Real-time updates for availability.

- **Ordering System:**

  - o Clients (BC) can add items to a cart and proceed with payment.

## 3.2. Client Wallet

- **Digital Wallet:**

  - o Clients can deposit funds into their wallets.

  - o View transaction history, including deposits, payments, and refunds.

## 3.3. Order Tracking

- **Order Status Updates:**

  - o Real-time tracking of order status (e.g., Received, Processing, On the Way, Delivered).

  - o Notifications via email/SMS for status updates.

## 3.4. Food Booking

- **Booking System:**

  - o Pre-order food for specific dates/times.

  - o Integration with the calendar for schedule management.

---
